## About O3SIS

O3SIS AG develops and sells carrier-grade mobile software solutions, providing personal applications and industry-leading data synchronization technology to mobile network operators, ISPs/ASPs, and large corporate customers worldwide.

O3SIS products - including today's leading implementations of consumer push e-mail, network address book, over-the-air backup & restore, and over-the-air multi-media publishing - enable our customers to build loyal subscriber communities, save costs, and create additional revenue opportunities by combining a best-in-class end user experience with mature and proven technology. O3SIS' innovative solutions are currently deployed by top tier mobile operators, including Vodafone Group, T-Mobile, Telefonica/O2, and KPN/E-Plus - with millions of users worldwide.

Founded in 1996, O3SIS is headquartered in Germany with North American offices located in San Francisco.

## Career Opportunities

Do you like working with exciting technology in an energetic environment? Do you enjoy being around intelligent people who know how to work hard and to tackle new challenges? Do you like knowing your contribution, talent, and ideas make a difference? Then get in touch with O3SIS.

### Employment Focus

- Product Marketing
- Software Design & Implementation
- Professional Services & Deployment Experts

All positions located in our headquarters near Cologne, Germany.

## The O3SIS Team

O3SIS currently employs an international team of about 60 professionals from twelve countries, and is on a growth path. We have created a company culture which is target oriented and focused, but also maintains our key values of acting responsibly, respectful, and trustworthy within the organization and towards our business partners and customers.

O3SIS has fast decision cycles and flat hierarchies, but also the processes and quality awareness needed to successfully support the large-scale software deployments at our demanding customer base. O3SIS company language for all internal and external documents is English. And, all O3SIS employees

- experience building the Next Generation of mobile communication,
- are part of a flexible and supportive team environment,
- receive a competitive compensation and
- can leverage the career opportunities of a fast-growing organization.

“O3SIS met our advanced and unique requirements to deliver over-the-air data synchronization and e-mail push via MMS for the consumer market best. O3SIS all-in-one platform allowed us to deliver a seamless and unique customer experience”

Marion Weidinger  
Product Manager at o2 (Germany)

“After an extensive evaluation process we decided to implement the A1 Adressbuch using O3SIS synchronization technology. Key reasons for our decision were the O3SIS technology leadership in this area and the professional device support”

Dr. Christian Köllerer,  
Senior Product Manager at Mobilkom Austria

“O3SIS has a well-defined platform that's based on standards, organically grown over time, and in sync with the emergence of market demands for the technology [...]. It all leaves O3SIS nicely positioned”

The 451 Group, 2007
